Personal Details

Name: Farid Hussain

Location: Guwahati, Assam

Languages Known: English, Hindi, Assamese

Projects

Netflix Clone - <https://faridhussain.github.io/Netflix-Clone/>

Netflix homepage using **HTML** and **CSS**. The focus of this project was on building a **responsive layout**, structuring sections similar to the original design, and maintaining proper spacing and alignment across different screen sizes. This project helped me strengthen my understanding of **CSS layout techniques and responsive design**.

Base Layout - <https://faridhussain.github.io/BaseLayout/>

I built a responsive base webpage using **HTML** and **CSS**. I focused on structuring the page layout, applying responsive techniques like media queries and flexible design so it adapts to different screen sizes. This project strengthened my understanding of **CSS** for layout, responsiveness, and clean structure without using any frameworks.

Lazarev - <https://faridhussain.github.io/Lazarev/>

A frontend project where I recreated the Lazarev agency website using **HTML**, **Tailwind CSS**, **JavaScript**, and **GSAP**. The main focus of this project was **UI design, layout structure, and smooth animations** using **GSAP**. Through this project, I practiced utility-based styling with **Tailwind** and implemented interactive animations with **JavaScript**.

EDUCATION

Bachelor of Computer Application

Pragjyotish College, 2024-2028 (currently pursuing)
