

Farid Hussain

Frontend Developer with experience building responsive and user-friendly web applications using React, Next.js, TypeScript, Tailwind CSS, Javascript, HTML and CSS. Passionate about creating clean, accessible, and high-performance user interfaces. Currently expanding my expertise in backend development with [Node.js](#), [Express.js](#), and MongoDB to build scalable full-stacks applications.

PROJECTS

Mega Blog - <https://mega-blog-seven-ebon.vercel.app>

Full-stack blog application build with React and Appwrite (BaaS). Includes authentication, CRUD functionality, TinyMCE editor, image uploads, protected routes, and responsive UI with well-commented, beginner-friendly code.

Dog Studio Clone - <https://dog-studio-clone-one.vercel.app>

A cinematic Dog Studio clone build with React, [Three.js](#), React Three Fiber, Drei, and GSAP, featuring an interactive 3D wolf model, scroll-driven animations, and immersive web experiences.

Image Editor - <https://resonant-boba-b43afe.netlify.app>

A simple browser-based image editor built using HTML, Tailwind CSS, and Javascript. You can upload an image, apply filters, use presets, and download the edited result.
